

PTS Work Experience Logbooks

From 1st September 2009, all individuals who attend PTS re-certification courses are required to provide a work experience logbook with two completed and endorsed entries. If the two work experience logbook entries are not completed and endorsed, the individual must attend initial training.

Work experience entries must be endorsed by a line manager.

If an individual holds a track safety competence higher than a PTS (e.g. COSS, Lookout) they are not required to complete the PTS work experience logbook. However all other logbooks **MUST** be completed where the associated competence is held (i.e. Lookout, COSS, IWA, Machine/Crane Controller etc.)

If anyone has yet to receive his or her Logbook, please contact your local office. Additionally, please ensure you have made at least two work experience entries and have had these endorsed, prior to attending a PTS re-certification course.
